Dianemo NC25 Smart Home Server

The Dianemo NC25 is a low cost, easy to install system designed specifically for the small and medium sized apartment market. It's tiny, consumes around 2w of energy and can be installed in a standard UK double gang pattress box or DIN rail mounted according to the needs of development. Despite it's small size, the Dianemo NC25 still boasts a full range of features and is powerful enough to provide a full range of Smart Home features in an apartment at an unrivalled installation price.

The NC25 comes pre-configured and provides control from our free App. It can provide the following features for your clients:

Lighting, Heating & HVAC control of all major manufacturers and protocols. Multiple manufacturers products can be presented in a unified and easy to use interface.

Dianemo can provide a link between IP based door entry systems like the IperVoice from Urmet and the clients Smart Phone or Tablet.

With the addition of our 20w in-wall amplifiers and ceiling speakers, Dianemo can also provide up to 4 independent zones of stereo audio. Listen to Internet Radio, Spotify or if connected to the clients own NAS, import and play their iTunes library and Playlists.

If the client has ripped movies on their NAS and a Smart TV, Dianemo can also integrate these and present them in our interface.**

Flexible Installation! This NerveCentre can be located wherever you want to site your clients network utilities and provides the interface to control all other components in a Smart Home environment.
